 leetcode  pandeydevashish43@gmail.com  9555183886  Devashish  Devashish90

Education

Amity University Gwalior, Madhya Pradesh

2021 – 2025

B.Tech. – Computer Science and Engineering

- GPA: 7.51/10.0

Shanti Dham Senior Secondary School Banda, Uttar Pradesh

2020 – 2021

12-PCM

Skills

Development and Technical Skills: C++, Python (NumPy, Pandas), SQL, Selenium WebDriver (RPA)

Cloud and AI Technologies: AWS Cloud Storage (Amazon S3), OpenAI API

Automation Skills: Selenium WebDriver (Python) Basic Automation Framework Understanding

Projects

Electricity Bill Automation System (RPA)

Mar 2026 – Present

Python, Selenium, Pandas, NumPy, AWS S3

- Developed a Python-based Robotic Process Automation (RPA) solution for automating electricity bill processing across multiple DISCOM portals.
- Implemented Selenium WebDriver for secure login, account navigation, bill verification, and PDF downloading through a single-session multi-account workflow.
- Utilized Python libraries including Pandas, NumPy, Requests, BeautifulSoup, pdfplumber, Apache Tika, and Regular Expressions for efficient workflow automation.
- Integrated AWS S3 cloud storage for centralized storage and management of bill documents.
- Designed robust exception handling, validation mechanisms, and logging modules to ensure reliable and fault-tolerant execution.
- Built database integration and automated status update mechanisms for seamless bill lifecycle management and operational monitoring.
- Optimized browser sessions and account grouping techniques to improve execution efficiency and reduce repeated logins.
- Developed reusable and scalable automation components following RPA best practices for large-scale utility operations.

Drone Surveillance and Monitoring System

Sept 2025 – Nov 2025

Python, OpenCV, Sensor Integration

- Developed Python-based solutions for drone data acquisition, monitoring, and automation tasks.
- Contributed to the design of a drone system for surveillance and disaster response applications to enhance situational awareness.
- Integrated sensors and communication modules to enable efficient real-time data collection and transmission.
- Implemented data processing and analysis workflows to improve system performance and operational reliability.
- Performed testing, debugging, and optimization of software components to ensure stable and efficient operation.
- Collaborated with team members to enhance system capabilities for critical and emergency response environments.

Experience

Python Intern (AI Automation)

March 2026 – Present

Applied Energy Technologies Private Limited

Roles and Responsibilities

- Developed Python-based Robotic Process Automation (RPA) solutions to automate utility and telecom business workflows.
- Built Selenium-based automation scripts for web interactions, data validation, and multi-account processing, improving operational efficiency.
- Utilized Python libraries such as Pandas and NumPy for efficient data manipulation and workflow optimization.
- Integrated AWS cloud services for centralized storage and management of automation outputs and reports.
- Implemented robust exception handling, logging, and validation mechanisms to ensure reliable execution of automation jobs.
- Worked with SQL databases and stored procedures for data retrieval, status tracking, and process monitoring.
- Identified, reported, and debugged automation failures and data inconsistencies, improving system stability and performance.
- Collaborated with team members to enhance automation frameworks and explore AI-driven solutions for process optimization.

Drone Development Intern

Sept 2025 – Nov 2025

Cerebrospark Innovations Pvt. Ltd

Roles and Responsibilities

- Developed Python scripts to support drone operations, data processing, and system automation tasks.
- Contributed to drone-based technologies aimed at improving disaster response, surveillance, and situational awareness.
- Assisted in integrating sensors and communication modules for efficient data acquisition and monitoring.
- Implemented data analysis and processing workflows using Python libraries to enhance system performance.
- Participated in testing, debugging, and optimizing software components to improve reliability and operational efficiency.
- Collaborated with cross-functional teams to enhance drone system capabilities for critical and emergency environments.
- Improved system stability and contributed to the development of robust solutions for real-time applications.

Certificates

- Oracle Cloud Infrastructure 2025 AI Foundations Associate
- Oracle Cloud Infrastructure 2025 Generative AI Professional
