PROFESSIONAL SUMMARY

AI/ML Developer with hands-on experience building RAG applications, LLM-integrated automation, and RPA workflows using Python, Selenium, UiPath, and OpenAI/LangChain. Experienced in API integration, CAPTCHA/document processing with generative AI, and intelligent automation pipelines. Solved 150+ DSA problems on LeetCode and holds Oracle Cloud Infrastructure AI certifications.

SKILLS

Languages & Frameworks: Python, C++, SQL, FastAPI

AI / ML Technologies: Machine Learning, NLP, Generative AI, LLMs, OpenAI API, Prompt Engineering, LangChain, RAG, Pandas, NumPy

Automation: Selenium, UiPath, Web Automation, Browser Automation, RPA

Databases & Tools: SQL Server, Stored Procedures, Query Optimization, Git, Postman, AWS S3

EXPERIENCE

AI/ML Intern — Applied Energy Technologies Private Limited

March 2026 – Present

- Developed Python-based Robotic Process Automation (RPA) solutions to automate utility and telecom business workflows.
- Integrated AI/GenAI technologies and APIs for intelligent document processing and CAPTCHA image analysis, replacing manual document-handling steps in the workflow.

Python Intern — Cerebrospark Innovations Pvt. Ltd

Sept 2025 – Nov 2025

- Built Python-based AI/ML-oriented data processing and automation solutions for drone technologies, supporting drone operations, surveillance, disaster response, and situational awareness applications.

PROJECTS

Electricity Bill Automation System (RPA)

Mar 2026 – Present

Python, Selenium, Pandas, NumPy, AWS S3

- Built a Python RPA solution using Selenium to automate electricity bill processing — including login, account navigation, and PDF downloading — across multiple DISCOM portals.
- Integrated OpenAI GPT-4o-mini for vision-based CAPTCHA image processing, connecting AI responses directly to Selenium to drive the automated billing workflow.

AI Video Meeting Assistant Using RAG

Sept 2025 – Nov 2025

Python, LangChain, Ollama, RAG

- Built an AI-powered meeting intelligence platform that processes YouTube videos and local audio/video files, performs speech-to-text transcription, and generates summaries, action items, key decisions, and open questions using LLMs.
- Implemented a RAG-based pipeline using LangChain and Ollama to retrieve relevant transcript context and generate context-aware answers, summaries, and meeting insights from long-form video content.

EDUCATION

Amity University Gwalior, Madhya Pradesh — B.Tech, Computer Science and Engineering 2021 – 2025

GPA: 7.51/10.0

Shanti Dham Senior Secondary School, Banda, UP — 12th (PCM)

2020 – 2021

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 AI Foundations Associate
- Oracle Cloud Infrastructure 2025 Generative AI Professional

ACHIEVEMENTS

- Solved 150+ coding problems in C++ on LeetCode; earned 1 coding badge.
- Achieved a 4-Star rating in C++ and SQL on HackerRank.

LANGUAGES

Spoken & Written : Hindi & English
